## **WAM B-402**

### **Boiler Treatment**

#### **Application**

WAM B-402 is a polyphosphate solution designed to precipitate boiler water calcium as a hydroxyapatite.

#### **Dosage**

The dosage will depend on feedwater hardness and boiler pressure. Consult your Waterside Asset Management representative for assistance.

#### **Feeding**

WAM B-402 should be applied directly to the boiler in such a manner that it will be thoroughly mixed with incoming feedwater. The feed should be continuous and proportional to flow.

#### **Packaging**

Available in polyethylene drums and totes.

#### **Technical Data**

Form	Liquid
Color	Colorless
Specific Gravity (g/mL)	1.207
Density lb/gal (kg/L)	10.07 (1.21)
pH (neat)	NDA
pH (1% solution)	6.5 to 7.5

Acceptable for use in food processing plants as determined in 21CFR Section 173.310, Food and Drug. This product is constructed with materials previously authorized by the USDA for use in federally inspected meat and poultry plants.

#### **Safety Data**

Do not open this container or use its contents without first reading the material safety data sheet. If one is not available, call (425) 293-5763 for a replacement.
