WAM C-152

Cooling Water Treatment

Application

WAM C-152 is a concentrated wetting agent for control of silt and airborne contaminants in industrial cooling systems. The product will penetrate and disperse fouling materials packed into low flow areas in basins as well as critical heat exchange areas. This production functions well in stressed conditions and is chlorine stable.

Dosage

The amount of product needed will vary with the composition and volume of the contaminating material. Consult your Waterside Asset Management representative for assistance.

Feeding

WAM C-152 is miscible with most common water treatment chemicals. Consult your Wellons Water Technology representative for exceptions.

Packaging

Available in polyethylene drums and totes.

Technical Data

Form	Liquid
Color	Colorless
Specific Gravity (g/mL)	1.018
Density lb/gal (kg/L)	8.50 (1.02)
pH (neat)	7.4 to 8.4
pH (1% solution)	9.0 to 10.0

Safety Data

Do not open this container or use its contents without first reading the material safety data sheet. If one is not available, call (425) 293-5763 for a replacement.
